

Creating a Website with WordPress

For many people today, creating and updating a personal website has become a fun and enjoyable hobby. A website can be used to share information about your family history, favorite genre of music or even to post the latest news and event information for a local club or organization.

Thanks to a variety of software and online services, creating a website has never been easier. With the free, user-friendly WordPress software, you can make your own personal and professional website in no time at all. This practical how-to book, shows you step by step exactly what to do. You start off by choosing an attractive theme (template) with which to build your website. Then you fill the website with your own text, pictures, videos and hyperlinks. You can even include a photo gallery, a pull-down menu with links to other pages, or an online form enabling people to contact you. These are just a few of the things that can be added to your website. WordPress offers a wide variety of plugins and widgets that can easily add extra functionality to your website. By using this book and the software from WordPress, you will have everything you need to create your own website!

Learn how to:

- Choose a theme and layout
- Add text, hyperlinks, images and videos
- Configure the settings
- Work with widgets and plugins
- Finalize your website and go live
